Packing List

The product package comes with the following items. In case any item is found missing, please contact ZHIYUN or your local selling agent.

Remote Controller X1
Extension Plate X1
Micro USB cable X1
ZW-Micro-002 cable X1
User Guide X1

Get to know Motion Sensor Remote Controller

1. Micro USB charging/communication port
2. Left side buttons (More seen on "Buttons Description")
3. Display screen (More seen on "Display Screen Description")
4. Front buttons (More seen on "Buttons Description")
5. Right side buttons (More seen on "Buttons Description")
6. Back buttons (More seen on "Buttons Description")
Preparing and Charging the Battery

TransMount Motion Sensor Remote Controller has a built-in battery. For the first time use, please fully charge the controller to activate the battery. Charging method: Connect Micro USB charging/communication port of the controller to the adapter (not provided, 5V1A is recommended) with provided Micro USB cable. When the battery icon stops blinking on the display screen, the charging is completed.

Installation

1. Install and connect the transmitter to WEEBILL-S with cables (More seen on TransMount Image Transmission Transmitter User Guide).

2. Install and connect receiver to the monitor with cables (More seen on TransMount Image Receiver User Guide).
3. Install the controller on the extension plate and tighten the screw.

To take off the controller from the extension plate, please loosen the screw first and press the safety lock. Finally push the controller out.

4. Install the monitor with the receiver on the extension plate.
5. Connect the controller and the Micro USB charging/communication port of the receiver with provided ZW-Micro-002 cable.

This cable is for communication between the controller and the receiver. After correct installation and connection, the controller (when powering on) will be automatically charging the receiver. The battery life of the controller will be affected.

How to Use

1. Buttons Description

1. Joystick
   Four-way direction control of the camera/lens on the stabilizer.
2. Video [●]
   Single press to start/end video recording.
3. Reposition
   Single press the button to reset the position of the stabilizer
4. Left [◀]
   - In the main screen, single press to move to the previous option.
   - In the menu screen, single press to move to the previous screen.
   - Control the electronic zoom when carrying a Sony camera.
5. Mode
   - Single press to switch among PF, L and F mode.
   - Double press to switch among POV, Go and Vortex mode.
   - Long press to enter or exit the standby mode.
6. LV Button
   - Single press the LV Button, the camera enter or exit the Live Preview mode.
   - Double press the LV Button to lock all buttons on the front side of the grip, and double press again to unlock the buttons.
   - Triple press to lock the joystick on the grip and double press to unlock it.
7. Dial
   - In the main screen, rotate the dial to adjust camera parameters.
   - In the menu screen, rotate the dial to switch between options.
8. Right [▶]
   - In the main screen, single press to move to the next option.
   - In the menu screen, single press to confirm the selection.
   - Control the electronic zoom of the camera when connecting to Sony camera.
2. Display Screen Description

- **The controller is charging**
- **Unconnected**
- **Camera params settings unadjustable**
- **Connecting with Sony cameras**
- **Menu screen**
- **Upgrade mode**

4. Use the Motion Sensor
1. Connect the transmitter with receiver, and perform WIFI pairing procedure.
2. Connect the transmitter with camera and WEEBILL-S. Turn on the devices.
3. Connect the receiver with monitor and controller. Turn on the devices.
4. After successful connection, the green light indicator of receiver shines solid. Push upward Motion Sensor On/Off button on the controller to turn on Motion Sensor. Push downward Motion Sensor On/Off button on the controller to turn off Motion Sensor.

- Motion Sensor of roll axis are off as default. To turn it on, go to menu settings> "motion"> adjust the speed of roll axis.
- After Motion Sensor turns on, the stabilizer enters locking mode automatically.
- To protect the camera when using motion sensor, the tilt axis control range is +135°~ -60°; the roll axis control range is ±45°; the pan axis control range is 360°.
- For the first time using motion sensor, please calibrate the controller. Find "calibration" in menu settings. Click "yes" to enter calibration. Follow the instruction "PUT IT ON THE TABLE" (put it level on the table) and the screen shows "WAITING...". Wait for 3 seconds and the screen shows "√". The calibration is completed. You can calibrate the controller again in actual use.
Connect the Micro USB charging/communication port of the controller and laptop with Micro USB cable to update firmware.

1. Open the front page of ZHIYUN official website: www.zhiyun-tech.com. Go to "download">"firmware". Download "ZHIYUN Calibration Upgrade Tool", "USBDriver" and the latest firmware of controller. (For iOS and Win10, you don't need to download USB Driver.)
2. Turn on the controller. Press Menu button and select "upgrade" to update the firmware. Press Right button to enter the "Upgrade Mode".
3. Open "ZHIYUN Calibration Upgrade Tool" and follow the firmware update tutorials to update.

Reading Tips

Legends: ⚠️ Important

Scan the QR code and operate under carrier network may cause traffic fee which will be charged by your carrier. It is recommended to operate under WIFI.
Warnings
Read the ENTIRE User Guide to become familiar with the features of this product before operating. Failure to operate the product correctly can result in damage to the product or personal property and cause serious injury. This is a sophisticated product. It must be operated with caution and common sense and requires some basic mechanical ability. Failure to operate this product in a safe and responsible manner could result in injury or damage to the product or other property. This product is not intended for use by children without direct adult supervision. DO NOT use with incompatible components or in any way otherwise as mentioned or instructed in the product documents provided by ZHIYUN. The safety guidelines herein contain instructions for safety, operation and maintenance. It is essential to read and follow all of the instructions and warnings in the User Guide, prior to assembly, setup or use, in order to operate the product correctly and avoid damage or serious injury.

Safe Operation Guidelines

CAUTION:
1. The controller is a high-precision control device. Damage may be caused to the controller if it is dropped or subject to external force, and this may result in malfunction.
2. The controller is not waterproof. Prevent contacts of any kind of liquid or cleaner with the controller. It is recommended to use dry cloth for cleaning.
3. Protect the controller from dust and sand during use.

WARNING:
To avoid fire, serious injury, and property damage, observe the following safety guidelines when using, charging, or storing your batteries.

Battery Use
Please fully charge the transmitter before use every time.

Battery Charging
The battery will automatically stop charging once it is full. Please disconnect the battery and the charger when fully charged.

Battery Storage
1. If the transmitter is not used for over 10 days, please discharge the battery to 40%-65% before storage in order to extend the battery lifespan.
2. When the battery voltage is too low, the battery will enter low consumption mode. Charge the battery to exit low consumption mode.

Battery Maintenance
1. Do not over-charge or over-discharge the battery, which will damage the battery;
2. The battery performance will be affected for not being used for a long time;
3. Never use the battery when the temperature is too high or too low;
4. Fully charge and discharge the battery every three months to maintain the battery health.

Battery Disposal
1. Please fully discharge the battery before putting it in the designated recycling bin. Batteries contain hazardous constituents and it is forbidden to put the battery in general waste bin. For related details please abide by the local laws and regulations on battery recycling and disposal.
2. If the battery cannot be fully discharged, never put it in battery recycling bin. Please contact battery recycling companies for a proper solution.

Warranty Period
1. Customers are entitled to replacement or free repair service in case of quality defect(s) found in the product within 15 days upon receipt of the product.
2. Customers are entitled to free repair service from ZHIYUN for any product proven defective in material or workmanship that results in product failure during normal consumer usage and conditions within the valid warranty period, which is 12 months counting from the date of delivery.

Warranty Exclusions
1. Products subjected to unauthorized repair, misuse, collision, neglect, mishandling, soaking, accident, and unauthorized alteration.
2. Products subjected to improper use or whose labels or security tags have been torn off or altered.
3. Products whose warranty has expired.
4. Products damaged due to force majeure, such as fire, flood, lightening, etc.
Warranty Claim Procedure

1. If failure or any problem occurs to your product after purchase, please contact a local agent for assistance, or you can always contact ZHIYUN’s customer service through email at SERVICE@ZHIYUN-TECH.COM or website at www.zhiyun-tech.com.
2. Your local agent or ZHIYUN’s customer service will guide you through the whole service procedure regarding any product issue or problem you have encountered. ZHIYUN reserves the right to reexamine damaged or returned products.
