	HERO6	Take photos, start/stop recording video, zoom in/out	
	HERO7		

- Updated on July 25th, 2019. This table will be updated in line with the newest firmware update and is subject to change without prior notice.
- For cameras listed in the table, photo/video shutter and zoom in/out can be controlled via the stabilizer grip, however, grip and App control are unavailable for a number of Canon compact and mirrorless cameras. Viewfinders of Canon M50 and M5 may interfere with the roll axis motor under balanced position, thus cannot enter Vortex mode. For such conditions, tilt axis needs to be readjusted to ensure normal usage. Camera cages are needed to add extra weight for balancing Sony DSC-RX0. For Sony cameras, please switch video/photo mode via camera directly.
- Some Sony, Panasonic and Canon mirrorless cameras can be physically balanced and stabilized on CRANE-M2 with the compatible lenses listed above.
- Zoom control of HERO5 is not available on CRANE-M2. Video recording function of Sony ILCE-6000 is not available on CRANE-M2.
- A wide range of smartphones can be physically balanced and stabilized on CRANE-M2 with the phone holder provided in the package. Video recording, photo taking, zoom as well as other features can be realized on your phone via ZY Play.
- Conditioned by the camera system, Panasonic camera screen will be blackout after video-recording for 30 seconds but it won't affect the gimbal's control of the camera.
- Conditioned by the camera system, Sony ILCE-6400 will require zoom lenses (such as Sony E PZ 16-50MM F3.5-5.6 OSS) to realize zoom control on CRANE-M2.
